"Five Points"

That's right, five—there are others, but
these are the important ones for you and
your eyes.

WHEN
—you frown or squint in looking at an
object.
—your eyes show an intolerance of
light.
—They tire, ache, smart or water.
—Objects swim or become dim.
—You have frequent headaches.

These are the points that point to the
need of glasses. Points that point to us.
Your eyes need looking into and looking
after, and none can do it better or more
economically than we.
